

IR Micro Office DALI2 APC.

Light management for individual rooms.

Offices are their passion. With its precision lens of 15 x 15 mm, the IR Micro Office DALI2 APC detects areas of up to 36 m². Installers love the networkable Bluetooth mesh technology and optimal factory settings – a true mount-and-forget solution for individual rooms. If required, it is possible to limit the detection zone using the easily attachable cover clips. What's more, thanks to DALI Broadcast, DALI light management can be established quickly with up to 20 participants. Available as surface mounting, with concealed wiring or as a ceiling-recessed variant. In addition to continuous light control, the sensor has a push-button that acts as a manual override function.
