Function description

State-of-the-art light cubes. The cubic L 835 C LED outdoor light without sensor sets every external home wall perfectly in scene with its elegant look and warm white LED light (3,000 K) and 616 lm. Ideal for terraces, home entrances and facades. Several lights can be interconnected to form light groups via app. If a sensor-controlled light is included, all lights switch ON automatically as soon as movement is detected. Intelligent functions such as dimmable main light, dimmable night light (when combined with an SC version), a pleasant soft light start, and a practical scheduling function ensure the right lighting scenario in every situation.
