Function description

Slim, precise and intelligent. Demanded by architects and planners, made by STEINEL. The IR Micro Office fulfils many wishes. Its low installation height makes it perfect for applications where no disruptive installations on the ceiling are desired. The micro precision lens measures just 15 x 15 mm. The 360° infrared presence detector covers 36 m². As a DALI-2 single master application controller, it controls up to 20 DALI devices in broadcast mode. In this way, it offers optimal lighting management for individual room solutions, including constant light control. Settings and networking are easily realised via Bluetooth Mesh.
