Function description

The safeguard for time-based automation. This timer never runs out of time thanks to the Real Time Clock. One year always has 31,536,000 seconds. A 7-day battery buffer ensures that the system continues to run smoothly even in the event of a power failure. The TCL PRO has a light sensor and can transmit the lux values to the system via Bluetooth Mesh. A perfect network sensor for safeguarding time-based automation.
