## Function description

Connected once. Illuminated twice. The T-Connector brings maximum flexibility to your 24V garden lighting system. With its two outputs, you can connect several lights or connecting cables at the same time - ideal for illuminating paths, flower beds or different garden areas at the same time. Thanks to Plug & Play, it is easy to integrate and gives you creative freedom when planning your lighting. Unused outlets can be sealed securely and watertight with the enclosed cover caps.
