Function description

The central power source for your lighting system. The power supply unit forms the centrepiece of your 24V garden lighting system. It is simply connected to a conventional 230V socket and reliably supplies all connected lights with power. Thanks to Plug & Play, the system can be expanded easily and as required - with matching cables in various lengths and different connectors. The power supply unit is available in two versions with 35W or 100W output - for small accents or large lighting scenarios.

Technical specifications

Dimensions (L x W x H)	156 x 48 x 33 mm	Ambient temperature	from -20 up to 40 °C
Manufacturer's Warranty	3 years	Housing material	Plastic
Version	100 W	Product category	24V-Garden Accessory
