Function description

High performance in small outdoor areas. Reliable lighting control, simple installation and a modern design: the nexx.IS basic series is specifically designed for surface-mounted installation and is already compliant with the new switch standard. Furthermore, the passive infrared motion detectors impress with a particularly low standby power consumption of just 0.11 W. Depending on the model, detection angles of 140°, 160° and 180° are available. The relevant settings can be conveniently adjusted using potentiometers. The lens, colour-coordinated with the housing, ensures a harmonious appearance. The integrated WAGO terminals enable quick and easy connection. The sensors are available in white, black and anthracite – to suit a variety of switch ranges and design concepts.
