Master circuit diagram

Master/master interconnection circuit diagram

The diagram shows a three-phase system with three transformers and a motor. The transformers are labeled with terminals P, S, N on top and L, L', N on the bottom. The motor is represented by a circle with a cross inside, labeled with terminals L and N. The system is connected to a three-phase supply (L, N) at the bottom. The first transformer has a switch on its P terminal. The second transformer has a switch on its S terminal. The third transformer has a switch on its N terminal. The motor is connected to the L and N terminals of the first transformer.
