

**STEINEL**<sup>®</sup>  
PROFESSIONAL

The only machine to weld as close as  
15 cm away from parapet corners.

**NEW**

The new automatic welding machine from STEINEL.

The innovation on flat roofs.

Automatic welding machine

## HG ROOF

Compact design: extremely easy to use, can be transported and handled by one person. High pressing force. Infinitely variable speed. Welding width up to 40 mm.

The HG Roof provides the capability of welding as close as 15 cm away from parapet corners as well as welding close to the edge. This drastically reduces manual finishing work. As the telescopic handle can be moved to the left and right, the automatic welding machine can be steered from both sides.

**Welding as close as 15 cm away from parapet corners**

### Technical specifications

Output .....	2300W
Welding temperature.....	50 -620°C (digital control of temperature with temperature indicated on the display)
Hot air tool motor .....	Brushless
Weight .....	Approx. 14 kg + 3 x 1.1 kg additional weights
Speed.....	1-5 m/min.
Welding width .....	Up to 40mm
Special features .....	Automatic welding machine can be steered from both sides
.....	Welding as close as 8 cm from the edge
.....	Welding as close as 15 cm away from parapet corners
Suitable for.....	thermoplastic roof membranes
